

P21

047U53688 Novembre 2015 - November 2015 - November 2015

ISTRUZIONI PER RANELLE CALIBRATE SERIE P21,

PER VALVOLA A SEI VIE R274, R274N (1")

INSTRUCTIONS FOR CALIBRATED WASHERS P21 SERIES,

FOR R274, R274N (1") SIX-WAY VALVE

ANLEITUNG FÜR DURCHFLUSSBLENDEN DER SERIE P21,

FÜR R274, R274N (1") SECHS-WEGE-ZONENVENTIL

GIACOMINI
WATER E-MOTION

Installazione - Installation - Montage

P21

Legenda - Legend - Legende

1	Ranelle calibrate (serie P21) - Calibrated washers (P21 series) - Kalibrierte Durchflussblenden (Serie P21)
2	Guarnizioni - Gaskets - Dichtungen
3	Bocchettoni - Tail pieces - Überwurfschraubungen

Versioni e codici - Versions and product codes - Versionen und Artikelnummern

Codice - Product code Artikelnummern	Kv	Cv	Versione - Version - Version
P21Y001	0,25	0,29	Da installare sulle valvole R274Y013, R274Y014, R274Y015, R274Y035*, R274Y135* To be installed on R274Y013, R274Y014, R274Y015, R274Y035*, R274Y135* valves Zur Montage bei R274Y013, R274Y014, R274Y015, R274Y035*, R274Y135* Ventile
P21Y002	0,40	0,45	
P21Y003	0,65	0,73	
P21Y004	1,0	1,15	
P21Y005	1,3	1,50	
P21Y006	1,6	1,85	
P21Y007	2,5	2,90	Da installare sulle valvole R274Y014, R274Y015, R274Y035*, R274Y135* To be installed on R274Y014, R274Y015, R274Y035*, R274Y135* valves Zur Montage bei R274Y014, R274Y015, R274Y035*, R274Y135* Ventile
P21Y008	3,45	4,00	

* Installabili solo in combinazione con i raccordi-optional - can only be installed in combination with the optional fittings

Nota - Note - Anmerkung

I valori di Kv e Cv indicati, sono relativi alle perdite di carico per il percorso completo di mandata e ritorno nella valvola, con applicazione della ranelle calibrata specifica // The given Kv and Cv values relate to the losses of pressure for the complete flow and return run in the valve, with application of the specific calibrated washer // Die angegebenen Kv und Cv-Werte beziehen sich auf die Druckverluste für den vollständigen Vor- und Rücklauf im Ventil, mit der Anwendung der spezifischen kalibrierten Durchflussblenden.

Impiego - Use - Anwendung

Nota - Note - Anmerkung

Le due ranelle calibrate sono usate per bilanciare la portata nei due circuiti (da sorgente 1 a utenza; da sorgente 2 a utenza). I due circuiti potrebbero richiedere differenti valori di Kv (o Cv), quindi possono essere usati due differenti codici di ranelle calibrate (vedere tabella a pag.1).

The two calibrated washers are used to balance the flow rate on the two circuits (source 1 to user; source 2 to user).

The two circuits may require different Kv (or Cv) values, so two different calibrated washer codes can be used (refer to the table on page 1).

Die beiden kalibrierten Durchflussblenden werden verwendet um die Durchflussmenge beider Systemkreisläufe auszugleichen (Kreislauf 1 zu Verbraucher; Kreislauf 2 zu Verbraucher). Wenn beide Systemkreisläufe unterschiedliche Kv-Werte (oder Cv-Wert) haben, kann mit Hilfe der Tabelle auf Seite 1 die entsprechende Durchflussblende ausgewählt werden.
