

San Maurizio d'Opaglio, 26/06/2020

"SUPPLIER CONFORMITY DECLARATION"

To the technical requirements provided for by Art. 4, Par. 3 of 2014/68/UE Directive concerning the harmonization of the legislations of the Member States regarding the provision on the market of the pressure equipment

(according to EN ISO/IEC 17050-1)

Giacomini S.p.A. company, manufacturer of components for heating, cooling and sanitary distribution systems, located in Italy, San Maurizio d'Opaglio (NO), Via per Alzo, no. 39, whose design and production processes comply with the requirements of the UNI EN ISO 9001:2015 standard

ATTESTS that

the ball valves

R254P, R259D

are designed and manufactured, using materials suitable to the distribution of water and non-dangerous gases, according to the good engineering practice in use, that ensures the safety of use, in accordance with the "technical requirements" and the specific, pertinent and applicable provisions, which are contained or recalled into **Art.4, par.3 of 2014/68/UE Directive**. Pursuant to the mentioned technical requirements and provisions, the above mentioned ball valves are accompanied by sufficient use instructions and are not "CE" marked according to the effects of **2014/68/UE Directive**.

The application range of the subject valves is

- water and non-dangerous gases
- Maximum working pressure with water and non-dangerous gas at ambient temperature (20°C):
 - 4,2 MPa (42 bar) sizes ½" and ¾"
 - 3,5 MPa (35 bar) sizes 1" and 1 ¼"

Eng. Marco Rosa Brusin

Technical Mnager
