

**K375**

### Warning.

- H319 - Causes serious eye irritation.
- H412 - Harmful to aquatic life with long lasting effects.
- P280 - Wear protective gloves/protective clothing/eye protection/face protection.
- P305+P351+P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- P337+P313 - If eye irritation persists: get medical advice/attention.
- P501 - If eye irritation persists: Get medical advice/attention.
- VOC content of the product ready for use: 0.07%

## Description

The additive **K375** is a product that has been specifically designed to work with radiant systems using synthetic pipes, thus preventing the corrosive action of oxygen dissolved within the system's water from damaging metal components (especially iron-based) of the system.

The European standard EN1264-4 - Annex A calls for the use of chemical inhibitors against corrosion as well as oxygen barrier pipes.

Implementation of both measures constitutes the most efficient protection against corrosion; oxygen can also seep into the system through the pump gaskets or automatic air venting valves.

## Versions and product codes

Product code	Quantity
K375Y001	1 lt.

## Use and doses

A 1-litre bottle is used as additive for approximately 200 litres of system water. Basically, 1 bottle per 700/800 m of pipeline. We recommend repeating these doses once a year in order to ensure maximum protection.

## Precautions

The solution K375 is non-toxic.

Keep out of reach of children and use gloves to handle the product.
